design  
engineering

Part 21G  
manufacturing  
solutions

EPA / PMA parts

Carpet kitting

Cabin retrofits

Seat modifications,  
repair, & refurbishment

## In partnership

Our partnership with Autostop Aviation, the largest seat cover manufacturing facility in Europe, brings expertise and a wealth of highly skilled fabric and leather technicians – delivering over 1 million seat covers to automotive clients per year.

All design, development, and manufacturing are carried out on-site and operate in a lean and low-cost manufacturing environment, ensuring we can deliver substantial cost savings.

## Quality Assurance

Autostop brings years of automotive seat cover manufacturing experience to meet the quality and compliance demands of aviation. The embedded Six Sigma principles mean aviation seat covers are manufactured to a tolerance of 1mm.

With active and full partnerships for EASA Part 21J DOA approved design, and EASA Part 21G organisations, products are released with EASA Form 1 certification.

# say hello

to greener skies with SkyLeather<sup>®</sup>

Save **16,000 kgs** of fuel, and **reduce your carbon footprint** by **50,000 kgs** per year, per aircraft\*

\*based on A320 and B737-800 operators

SkyLeather<sup>®</sup> - an eco-friendly, durable, & lightweight 100% water-based material for aircraft seats.

**Lightweight** – SkyLeather<sup>®</sup> weighs only 390 g/sqm, saving 0.96 kg per seat compared to genuine leather

**Durable** – high durability ensures resistance to abrasion, making SkyLeather<sup>®</sup> scratch and stain resistant and easy to maintain

**Eco-friendly** – 100% water-based material - free from harmful substances and solvents with no toxic by-products

**High elasticity** – simplifies the fitting of complex seat shapes, and seat covers maintain their shape to look new for longer

**Colour matched to your cabin** – SkyLeather<sup>®</sup> is available in any colour
