

## In-house repair and overhaul

AJW Technique is the state-of-the-art maintenance hub for AJW Group's component repair and overhaul service. We work directly with leading airline customers to improve component reliability, maximise time on-wing and reduce direct maintenance costs.

With our highly skilled, licensed engineers and technicians, AJW Technique is in a prime position to provide outstanding reliability, guaranteed availability, and first-class turn times, delivering improved efficiencies and reduced cost of AOG dependency.

ability to process **35,000** units a year across **6,000** part numbers

repairs supported by **US \$500m** of exchange ready inventory

### 20 strategic partnerships

including Honeywell, Thales, Safran, Collins Aerospace

**10 x global approvals** TCCA, FAA, CAA, EASA, ANAC, CAAC, CAAN, CAAS, HKCAD, JCAB

## Battery shop capabilities

AJW Technique Europe is a Centre of Excellence for battery repair and overhaul. Skilled and certified technicians offer deep cycle, top charge, cleaning, re-blocking, regular service, overhaul, test and recertification for all commercial aircraft main, auxiliary, and emergency Ni-Cad power supplies.
