

Environmental & Energy Policy - QDoc89_v9

Policy Statement

AJW Group (A J Walter Aviation Limited) is committed to protecting the environment, preventing pollution, and continually improving its environmental and energy performance. This policy builds on our existing ISO 14001 certified Environmental Management System and integrates energy management principles aligned with ISO 50001.

We will comply with all applicable environmental, energy, and climate-related legal and regulatory requirements and with other requirements to which the organisation subscribes, including Streamlined Energy and Carbon Reporting (SECR).

This policy provides the framework for setting and reviewing environmental and energy objectives and targets and supports continual improvement across our operations, facilities, and supply chain.

Environmental Commitments

AJW Group is committed to:

- Preventing pollution and minimising environmental impacts arising from our activities, products, and services.
- Continually improving environmental performance through risk-based controls, objectives, and action plans.
- Incorporating environmental considerations into business planning, decision-making, and investment.
- Increasing environmental awareness and competence through training and engagement. Setting, reviewing, and achieving environmental objectives and targets.

Energy Commitments

AJW Group is committed to:

- Continual improvement of energy performance, including energy efficiency, energy use, and energy consumption.
- Reducing energy consumption where reasonably practicable through operational control, technology, and behaviour.
- Considering energy performance when procuring equipment, services, and facilities.
- Increasing the use of renewable energy, including on-site generation where feasible.
- Providing information and resources necessary to achieve energy objectives and targets.

Operational Focus Areas

Our environmental and energy controls include:

- Waste minimisation through reduction, reuse, repair, and recycling.
- Efficient use of energy, water, and materials.
- Sustainable procurement and supplier engagement.
- Low-carbon travel and transport initiatives.
- Environmentally responsible maintenance and cleaning practices.

Monitoring, Review & Continual Improvement

AJW Group monitors and measures environmental and energy performance using defined indicators, audits, and performance data, including SECR disclosures. Performance is reviewed by top management as part of formal management review to ensure the ongoing suitability, adequacy, and effectiveness of the Environmental and Energy Management Systems.

Governance & Responsibility

The Chief Executive Officer and senior management are accountable for environmental and energy performance. Responsibility for implementation is supported by line management and the HS&E function.

This policy is communicated to all persons working for or on behalf of AJW Group and is available to relevant interested parties. It is reviewed annually or following significant organisational or operational change.

Signed on behalf of AJW Group:

Clyde Buntrock
